Integration & Expansion

Time Attendance & Leave Management Systems

Access Control Management System

Visitor Management & Meeting Room Booking Management

Third-Party Software Integration – API support for enhanced compatibility.

Access Control Software is a comprehensive security solution designed for modern organizations, integrating mobile access, QR codes, facial recognition, fingerprint scanning, and card-based authentication. It enhances security, streamlines operations, and provides a seamless user experience for corporate offices, societies, educational institutions, and high-security facilities.

Controller Management – Configure and manage access control panel, store regulated door operations and security settings.

Reader Management – Administer and monitor RFID, biometric, and mobile-enabled readers for secure authentication.

Access Group Management – Define and assign user access levels based on roles, locations, and time restrictions.

Software Driven Door Open Facility – Enable remote door unlocking through a centralized software system.

User Management – Create, modify, and deactivate user profiles with assigned access credentials and permissions.

Staff Enrollment (Finger/Face/Card/PIN/Mobile Key) Register employees with multiple authentication methods for secure access.

MIS Reports – Generate detailed reports on access logs, user activity, and system performance for audit and analysis.

Supports Integration with My SQL, ORACLE. Seamlessly integrated with Rosslare Brand Controller and Readers.

PRE-REQUISITES

Server & Workstation Requirements

- ✓ Operating System: Windows 10 or Server 2016 & above
- ✓ Processor: Intel Core i5 or higher
- ✓ RAM: Minimum 8 GB & above
- ✓ Storage: 500 GB HDD
- ✓ Browser Compatibility: Chrome, Firefox, Safari
- ✓ Backend Database: MS SQL 2016 or above
- ✓ IIS Support: 7.0 & above

Mobile App Compatibility

- ✓ Platforms Supported: iOS, Android
- ✓ Cloud & On-Premises Options: Available
